#### INTRODUCTION

The Utah Traffic Records Information Systems Strategic Plan serves as a guiding document for Utah's Traffic Records Advisory Committee (UTRAC). The purpose of this document is to provide a guide for Utah's traffic records information community to work towards increasing timeliness, accuracy, completeness, accessibility and uniformity of Utah's traffic records systems. This document offers a foundation to member and their organizations to continue working as one cohesive committee in efforts to improve and update data systems. Within this document are goals and objectives set forth as a committee to be used as a measurement tool of system improvement over the next five years.

#### PLANNING PROCESS

Goals and performance measures contained in this document are based upon the recommendations and findings from the most recent assessment conducted on the Utah traffic records information system. Assessment recommendations from other related traffic safety studies have also played a role in determining the some of the goals and objectives in specific areas of the strategic plan. The most recent traffic records assessment conducted in Utah occurred in May, 2014. This assessment was conducted by the National Highway Traffic Safety Administration (NHTSA). In June, 2011, the Federal Highway Administration (FHWA) facilitated a Crash Data Improvement Program (CDIP) Assessment. The recommendations and findings from these assessments drive the direction of the strategic planning process.

With the assessments as guides, a framework was developed for Utah's Traffic Records Information System Strategic Plan. Additionally, the Utah Traffic Records Advisory Committee (UTRAC) members, provided direction and feedback on the focus of the goals and objectives using their diverse expertise and experience in each of the traffic safety related areas.

#### STRATEGIC PLAN REVISION AND ACCOUNTABILITY

This document is intended to be a living document. As with prior strategic plans, this plan will be reviewed by the UTRAC on an annual basis. Reviewing the plan annually provides an opportunity for committee members to revise project plans to better meet changes in organizational priorities, as well as, any changes at the state or federal level.

The performance measures given in the goals and objectives section will be reviewed for progress at least annually. By doing so, the committee can ensure that data improvement projects are moving forward in a timely manner as prescribed by the State. Additionally, such improvement will ensure that demonstrated measurable progress will be met for the annual MAP21 405( c ) certification.

#### UTAH TRAFFIC RECORDS ADVISORY COMMITTEE OVERVIEW

The Utah Traffic Records Advisory Committee (UTRAC) is a multidisciplinary, interagency committee that has agreed to collaborate in the implementation of the Utah Traffic Safety Information Systems Strategic Plan. The mission of UTRAC is to provide more timely, accurate, complete, uniform, integrated and accessible data to the traffic safety community.

The Utah Traffic Records Advisory Committee (UTRAC) is operational and functioning, and members of UTRAC represent the interests of the following:

- Highway safety;
- Highway infrastructure;
- Law enforcement and adjudication;
- Public health and injury control;
- Motor carrier agencies and organizations.
- Local organizations

#### ROLE OF UTAH TRAFFIC RECORDS ADVISORY COMMITTEE

The role and function of the Utah Traffic Records Advisory Committee (UTRAC) is outlined as follows:

- Review and approve the Utah Traffic Safety Information Systems Strategic Plan;
- Review Utah's highway safety data and traffic records systems;
- Review changes to Utah's highway safety data and traffic records systems before the changes are implemented;
- Provide a forum for the discussion of highway safety data and traffic records issues;
- Report any highway safety data and traffic records issues to the agencies and organizations in Utah that create, maintain and use highway safety data and traffic records;
- Consider and coordinate the views of organizations in Utah that are involved in the administration, collection and use of the highway safety data and traffic records system;
- Represent the interests of the agencies and organizations within the traffic records system to
  outside organizations; and
- Review and evaluate new technologies to keep the highway safety data and traffic records systems up-to-date.

#### STATE OF UTAH UTAH TRAFFIC RECORDS ADVISORY COMMITTEE (UTRAC) STRATEGIC PLAN ENDORSEMENT

Authority and commitment to serve as a member of the Utah Traffic Records Advisory Committee with the outlined role and function is demonstrated by a representative signature from each of the following agencies and/or associations.

Representatives of the Utah Traffic Records Advisory Committee have reviewed the Utah Traffic Information Systems Strategic Plan and endorses the plan.

Ron Bowmaster, Administrative Office of the Courts	Date
Paul Patrick, Dept. Health, Bureau of Emergency Medical	Date
Services and Preparedness	2 0.00
Philip Bates, Dept. Technology Services, Dept. of Public Safety	Date
Nannette Rolfe, Dept. of Public Safety, Driver License Division	Date

## UTAH TRAFFIC RECORDS INFORMATION STRATEGIC PLAN ELEMENTS

## STRATEGIC GOALS

- **Timeliness:** Reduce or maintain the span of time between the occurrence of an event and entry into the appropriate traffic records database.
- Accuracy: Increase the amount of traffic records data that is error-free, satisfies internal consistency checks, and does not exist in duplicate within a single database.
- **Completeness:** Decrease both the number of records that are missing from the traffic records databases and the number of missing data elements in the records that are in the databases.
- **Uniformity:** Update and maintain the consistency among the files or records in the traffic records systems and how they measure against independent or national standards.
- **Integration:** Increase the ability of records in a database to be linked to a set of records or components thereof in another traffic records database.
- Accessibility: Facilitate the ability of legitimate users to successfully obtain desired data in traffic records systems.

## PERFORMANCE MEASURES

<u>**Timeliness**</u>: Reduce or maintain the span of time between the occurrence of an event and entry into the appropriate traffic records database.

T1: Decrease the crash repository.	e average number	of days from the c	lay of the crash ev	ent to initial subm	ission to the
YEAR	2013	2014	2015	2016	2017
# days	49.83	8.56			
T2: Increase the	percentage of cras	sh reports submitte	ed into the databa	se within 30 days	after the crash.
YEAR	2013	2014	2015	2016	2017
% submitted	74.63%	95.73%			
T3: Decrease the	e median number (	of days from fatal of	crash event to initia	al FARS Entry.	
YEAR	2014	2015	2016	2017	2018
# days	39				
T4: Decrease the MCMIS file from	e median days fror 53 to 30	n a commercial ve	hicle crash event	to crash submissic	on to FMCSA
YEAR	2014	2015	2016	2017	2018
# days	53				
T5: Decrease the	e median days fror	n the crash event	to crash geo-locat	ed on crash file fro	om 218 to 21.
YEAR	2014	2015	2016	2017	2018
# days	90				
T6: Decrease the violation event.	e percentage of cit	ations filed with C	ORIS greater than	5 days past the d	ate of the
YEAR	July 2012	July 2013	July 2014	July 2015	July 2016
% citations	10.4	12.6%	9.6%		

T7: Decrease the number of median days from date of event to date accessible in trauma registry.						
YEAR	2014	2015	2016	2017	2018	
# days						
	e mean number of a report is issued t			e at the Utah Publ	ic Health	
YEAR	2014	2015	2016	2017	2018	
# days						

### **<u>Accuracy</u>**: Increase the amount of traffic records data that is errorfree, satisfies internal consistency checks, and does not exist in duplicate within a single database.

ACR1: Decrease the percentage of crash records with errors in alcohol/drugs, manner of collision, first harmful event/location, and sequence of events, vehicle maneuver and speed.					
YEAR	4/1/13-3/31/14	4/1/14-3/31/15	4/1/15-3/31/16	4/1/16-3/31/17	4/1/17-3/31/18
% with errors					
Alcohol/drugs Manner of collision First harmful	6.6% 12.8% 9.3%	2.1% 7.8%			
event location Sequence of events	11.7%	3.1%			
Vehicle maneuver Speed	6.5% 63.0%	6.5% 55.1%			
	e the percentage of formance measure will				
YEAR	2014	2015	2016	2017	2018
% with errors					
ACR3: Decrease the percentage of Trauma Registry records with errors in certain fields (The specific data elements for this performance measure will be inserted in 2015, once EMS has implemented their new integrated system)					
YEAR	2014	2015	2016	2017	2018
% with errors					

ACR4: Decrease the percentage of Emergency Room records with errors in certain fields. (The specific data elements for this performance measure will be inserted in 2015, once EMS has implemented their new integrated system)							
YEAR 2014 2015 2016 2017 2018							
% with errors							
	e the percentage of s performance measure						
YEAR	2014	2015	2016	2017	2018		
% with errors							

**<u>Completeness</u>**: Decrease both the number of records that are missing from the traffic records databases and the number of missing data elements in the records that are in the databases.

C1: Decrease the percentage of crash reports with unknowns or blanks in critical data elements for which unknown is not an acceptable value.					
YEAR	4/1/12-3/31/13	4/1/13-3/31/14	4/1/14-3/31/15	4/1/15-3/31/16	4/1/16-3/31/17
First Harmful Event	1.15%	1.14%	0.59%		
Crash Severity Manner of	0.13%	0.21%	0.08%		
Collision	0.47%	0.59%	0.24%		
C2: Increase the referenced from	percentage of put 31 to 100.	blic roadways with	route and milepos	t (LRS) accurately	identified or
YEAR	2014	2015	2016	2017	2018
% roadways with LRS accurately identified	31				

**Uniformity**: Update and maintain the consistency among the files or records in the traffic records systems and how they measure against independent or national standards.

U1: Maintain the number of NEMSIS data elements supported by Utah at 100%.							
YEAR	2014	2015	2016	2017	2018		
% Elements	100%	100%					
U2: Increase the	percentage in con	npliance with MML	JCC 4.0 reporting	standards.			
YEAR	YEAR 2014 2015 2016 2017 2018						
% Elements 66.4% 68.7%							

**Integration:** Increase the ability of records in a database to be linked to a set of records or components thereof in another traffic records database.

11: Increase the percentage of crash, location, vehicle, driver elements integrated with FARS database.						
YEAR	2014	2015	2016	2017	2018	
% elements	0	0	0			
I2: Increase the r	number of driver ar	nd/crash records ir	ntegrated for traffic	safety analysis p	urposes.	
YEAR	2014	2015	2016	2017	2018	
# records	0					
13: Increase the r	13: Increase the number of vehicle and crash records integrated for traffic safety analysis purposes.					
YEAR	2014	2015	2016	2017	2018	
# records	0					

#### UTAH TRAFFIC RECORDS INFORMATION SYSTEMS STRATEGIC PLAN

I4: Increase the number of citation and crash records integrated for traffic safety analysis and resource management purposes.							
YEAR	2014	2015	2016	2017	2018		
# records	0						
15: Increase the r	I5: Increase the number of crash and prehospital records integrated for traffic safety analysis purposes.						
YEAR	YEAR 2014 2015 2016 2017 2018						
# records 0 0							

16: Increase the percentage of records in prehospital file linked to trauma registry within 90 days.						
YEAR	2014	2015	2016	2017	2018	
# records	0					
17: Increase the p	percentage of reco	rds linked betwee	n the prehospital a	nd hospital discha	rge files.	
YEAR	2014	2015	2016	2017	2018	
# records	0					
18: Increase the p	18: Increase the percentage of records linked between the Hospital Discharge and Vital Records file.					
YEAR	2014	2015	2016	2017	2018	
# records	0					

19: Increase the number of adjudicated citation records linked to crash records.						
YEAR	2014	2015	2016	2017	2018	
# records	0					
110: Increase the	percentage of cita	ation records linke	d to roadway file.			
YEAR	2014	2015	2016	2017	2018	
# records	0					

I11: Increase the number of roadway systems interfaced internally with other roadway systems.					
YEAR	2014	2015	2016	2017	2018
# systems	0				
112: Increase the	number roadway	attributes and cha	racteristics linked	to citation records	file.
YEAR	2014	2015	2016	2017	2018
# roadway elements	0				
I13: Increase the number of roadway attributes and characteristics linked to FARS file.					
YEAR	2014	2015	2016	2017	2018
# roadway elements	0				

# **Accessibility:** Facilitate the ability of legitimate users to successfully obtain desired data in traffic records systems.

ACS1: Increase percentage of law enforcement agencies and organizations utilizing the official DDACTS Mapping Tool.						
YEAR	2014	2015	2016	2017	2018	
# agencies	0					
ACS2: Increase	the number of use	rs accessing UDO	T's portal for Data	requests.		
YEAR	2014	2015	2016	2017	2018	
# users	0					
ACS3: Increase	ACS3: Increase the number of users accessing IBIS for data requests.					
YEAR	2014	2015	2016	2017	2018	
# users						

ACS4: Increase the number of data requests accessed through Utah Highway Safety Office web site.						
YEAR	2014	2015	2016	2017	2018	
# data requests	0					
	ACS5: Maintain the Crash data dictionary so that it is kept up to date, consistent with manuals/reports/training materials, contains edit checks and validation rules, and explains each data element.					
YEAR	2014	2015	2016	2017	2018	
Data Dictionary Updated	Yes	Yes				
ACS6: Increase the number of requests for vital records accessed through the online request form.						
YEAR	2014	2015	2016	2017	2018	
# data requests						

## UTAH TRAFFIC RECORDS INFORMATION SYSTEMS DEMONSTRATED MEASURABLE PROGRESS

The provisions of the Section 405(c) grant application require States to demonstrate measurable improvement in at least one of the six core systems. Improvement must be shown in one of the prescribed performance areas of timeliness, accuracy, completeness, uniformity, accessibility, and integration.

In accordance with the requirement, Utah submits the following performance measures as its demonstrated measurable progress for certification FFY2016:

	Performance M	easure #1		
Performance Area:	Crash Timeliness			
	In	nprovement Details		
Baseline Value	Current Value	Beginning Date	Ending Date	Improvement +-
28.65 days	8.18 days	4/1/2014	3/31/2015	20.47 days
